SUPERMAN

WHITEPAPER VOL. 3

ABOUT SUPERMAN

Tired of the endless dog and frog memes and all their low energy, low effort copycats?

The experienced team from Krypton Calls has created the memecoin with more financial and marketing backing than any memecoin you have ever seen before. The dogs and frogs have had their day, step aside for the new King of the Memes.

Superman's Team has connections to most of your favourite influencers and call groups, inside plugs with all the trending and charting sites, DEX's and CEX's and they will be going hard from launch, to make sure everyone knows that Superman has come to Crypto.

Sick of useless NFTs that do nothing? Superman NFTs will x2-6 your investment annually, with the use of an advanced AI trading platform provided by VFX Worldwide. While also feeding back into the low tax Superman Token.

Forget about the Moon, we are heading straight back to Krypton!

Pulse AI Trading

An additional Pulse AI Trading Business Account has been secured for Superman Token.

This will net $15-75k per month for the Superman Token.

NFTs boost amount of tokens you get in the presale, please refer to previous page.

WHAT IS PULSE?

Pulse is a product developed by VFX Worldwide. It uses advanced ai algorithmic trading indicators in tandem with two large teams of competing traders. These traders have developed numberous competing strategies to maximise returns for Pulse account owners.

Pulse returns between 0.5-2.5% on principal amount daily. This Daily return can also be compounded to exponentially increase the principal sum.

Funds are not locked in Pulse and can be removed if required at anytime. All investors of projects that implement Pulse can track all information on the daily gains. VFX and investors can both monitor accounts to ensure funds are being used in a fiduciarily responsible manner.

Superman's Team has secured two Pulse accounts. One is the business account (Caps at 100k) for Superman, used directly for the Token, the other is a persoanl VIP Pulse account (Caps at 500k) where a 100k portion equivalent to the business account will be used for paying the NFT Holders.

As the NFT holders will be payed in $SUP, the use of both accounts will produce beneficial volume, buy backs, burns, adding to the liquidity pool, marketing and development to a sum in the range of $30,000-175,000 per month. These funds will strickly be used for the Superman project.
